Tile Option:

If the Council wish to have tiles beneath the items instead of wetpour which has been quoted above(Mallory, 2.4m Log Swing with Bird's Nest Seat, Junior Comet and Walk the Plank), the total would be £56,327.00 excl. VAT. This figure includes the supply and install of the tiles, necessary groundworks and new timber edging.

Total Excl.VAT

£52,500.00

Wicksteed manufactured steel products are coated externally with Zinc Metal Thermal Spray Pre-treatment - applied in accordance with BS5493, prior to polyester powder painting (unless otherwise stated). Wicksteed is the only major playground equipment manufacturer to provide this zinc pre-treatment. We work closely with our paint suppliers to ensure we adhere to or surpass all legislation in regards to Lead and Cadmium levels in our powder coating process. We are able to supply a copy of the Safety Data Sheet upon request.

Wicksteed's paintwork is guaranteed against corrosion for a period of 7 years, whilst the metalwork is guaranteed against structural failure for 25 years.

(These guarantees exclude normal wear and tear, accidental damage and acts of vandalism.)

Wicksteed ensures that the timber used in the manufacture of products comes from forests with certified tree replacement programmes.

Wicksteed give a 15 year Timber guarantee for machine-round structural timber components and a 10 year Timber guarantee for all laminated pine supports on playground equipment against rot and insect infestation which impairs the structural integrity of the product. Machine rounded timber components used for landscaping purposes and any timber installed into loose full surfacing are guaranteed for 5 years. Untreated natural timber is not guaranteed against rot or infestation.

(excluding normal wear and tear, accidental damage and vandalism)

Our quotation includes 'EcoTumble' Surfacing which has been tested by 'Centre for Sports Technology' which resulted in reports to understand it's Critical Fall Heights (CFH). The samples were tested laid onto an area of established grass. If asked for, Wicksteed can provide these reports which show that laid onto natural turf, 40mm thick achieved 2m CFH. 50mm thick achieved 2.5m CFH and 60mm achieved 3m CFH. On some occasions if the site conditions do not meet the requirements stated, there could be further costs for additional groundworks and extra surfacing to meet the CFH.

Wicksteed Ecotumble Surfacing is laid by Wicksteed's fully trained and approved personnel and has been tested in accordance with and certified to both BS EN 1177:1998 and BS 7188:1998. A copy of the Test Certificate is attached. We confirm that we will guarantee our Ecotumble Surfacing for a period of two years

(excluding normal wear and tear, accidental damage and acts of vandalism).

When evaluating your requirements and preparing this quotation, Wicksteed Leisure Limited (Wicksteed) has endeavoured to ensure that the requirements of Part III of the Disability Discrimination Act 1995 (DDA) are taken into account. Whilst Wicksteed is pleased to be able to pass on to its customers its knowledge and experience relating to the DDA and the design of playground equipment and play areas, no warranty is implied or given by Wicksteed as to DDA compliance.

Playground providers/owners have the ultimate responsibility for the legal requirements relating to their play areas. There are many points that Wicksteed is unable to take into account that require consideration by each playground provider before DDA compliance can be assured. Two examples are:- specific local community needs and what are construed as "reasonable steps" to enable (or make it easier for) disabled children to use the play area(s). Each new or existing play area must be examined on its own merits.

Wicksteed recommends that all playground providers should refer to the publication "Developing Accessible Play Space - A Good Practice Guide", published by the Office of the Deputy Prime Minister.

Work can commence within 6 to 8 weeks from receipt of an order.
